Wieckowski, A. 131
Wrona, P.K. 159

Zhang, A.J. 63

Subject index

Adsorption characteristics
Adsorption characteristics by a radiochemical method on smooth electrode surfaces (Sung et al.) 131
Ag (311) electrodes
Crystal face specificity of fluoride adsorption on Ag electrodes: the (311) face (Veggini et al.) 125

β^- backscattering
Investigation of the electrodeposition and behaviour of Re layers by coupled radiochemical and electrochemical methods (Horányi, Bakos) 143
BICUVOX
Impedance measurements on single crystals of the oxygen ion conductor BICUVOX (Kurek et al.) 77
Butanol solutions
Water and electrolyte structure at Ag electrodes in nonaqueous butanol solutions using surface-enhanced Raman scattering (Pemberton, Joa) 149

Chalcogenide glasses
Chalcogenide glass chemical sensors: relationship between ionic response, surface ion exchange and bulk membrane transport (Vlasov, Bychkov) 201
Charged membranes
A new method for determining transport numbers of charged membranes from convective diffusion experiments (Kontturi et al.) 111
Chemical sensors
Chalcogenide glass chemical sensors: relationship between ionic response, surface ion exchange and bulk membrane transport (Vlasov, Bychkov) 201
ClO_4^- reduction
Investigation of the electrodeposition and behaviour of Re layers by coupled radiochemical and electrochemical methods (Horányi, Bakos) 143
Convective diffusion
A new method for determining transport numbers of charged membranes from convective diffusion experiments (Kontturi et al.) 111
Crystal face specificity
Crystal face specificity of fluoride adsorption on Ag electrodes: the (311) face (Veggini et al.) 125

Discreteness-of-charge effects
Discreteness-of-charge effects at an electrode covered with a self-assembled monolayer containing a simple redox couple (Fawcett) 117
Disordered solids
Power-law exponents and hidden bulk relation in the impedance spectroscopy of solids (Macdonald) 17

Electrochemical measurements
Critical issues associated with interpretation of impedance spectra (Orazem et al.) 51
Electrochemical reactions
The role of water and temperature in the electrochemical behavior of solid iron(III) hexacyanoferrate(II/III) (Piela et al.) 159
Electrochemical sensors
Organic membranes for miniaturized electrochemical sensors: fabrication of a combined pO_2, pCO_2 and pH sensor (Arquint et al.) 177
Electrochemical simulations
The Richtmyer modification of the fully implicit finite difference algorithm for simulations of electrochemical problems (Mocak, Feldberg) 31
Electrodeposition
Investigation of the electrodeposition and behaviour of Re layers by coupled radiochemical and electrochemical methods (Horányi, Bakos) 143
Electroreflectance
Electroreflectance study of redox reactions of methylene blue incorporated into polypyrrole coated on a pyrolytic graphite electrode (Imabayashi et al.) 103

Fluoride adsorption
Crystal face specificity of fluoride adsorption on Ag electrodes: the (311) face (Veggini et al.) 125

Glasses
Chalcogenide glass chemical sensors: relationship between ionic response, surface ion exchange and bulk membrane transport (Vlasov, Bychkov) 201

Hidden bulk relaxation
Power-law exponents and hidden bulk relation in the impedance spectroscopy of solids (Macdonald) 17

Impedance
Impedance characterization of thin electrochemically formed palladium oxide films (Zhang et al.) 63
Impedance spectra
Model dependence and reliability of the electrochemical quantities derived from the measured impedance spectra of polymer modified electrodes (Inzelt, Láng) 39
Impedance spectroscopy
Power-law exponents and hidden bulk relation in the impedance spectroscopy of solids (Macdonald) 17
Critical issues associated with interpretation of impedance spectra (Orazem et al.) 51
Ionic conductivity
Impedance measurements on single crystals of the oxygen ion conductor BICUVOX (Kurek et al.) 77
Ion-selective charge separation
Non-stoichiometric dissolution of lanthanum fluoride (LaF_3) and its relevance to a process of ion-selective charge separation at the solid|solution interface (Tani et al.) 205

Ion-selective electrodes
Theory of transient potential response of ion-selective electrodes based on polarizable liquid|liquid Interface (Senda) 215
Iron(III) hexacyanoferrate(II/III)
The role of water and temperature in the electrochemical behavior of solid iron(III) hexacyanoferrate(II/III) (Piela et al.) 159

Lanthanum fluoride
Non-stoichiometric dissolution of lanthanum fluoride (LaF_3) and its relevance to a process of ion-selective charge separation at the solid|solution interface (Tani et al.) 205
Lithium insertion
Lithium insertion in WO_3 studied by simultaneous measurements of impedance, electrogravimetric and electro-optical transfer functions (Gabrielli et al.) 85
Lithium salts
Water and electrolyte structure at Ag electrodes in nonaqueous butanol solutions using surface-enhanced Raman scattering (Pemberton, Joa) 149

Metal preconcentration
A hollow fibre supported liquid membrane system for metal speciation and preconcentration: calculation of the response time (Keller et al.) 165
Methylene blue
Electroreflectance study of redox reactions of methylene blue incorporated into polypyrrole coated on a pyrolytic graphite electrode (Imabayashi et al.) 103
Molecular structure
Water and electrolyte structure at Ag electrodes in nonaqueous butanol solutions using surface-enhanced Raman scattering (Pemberton, Joa) 149

Na^+-selective CHEMFETs
The design of durable Na^+-selective CHEMFETs based on polysiloxane membranes (Brunink et al.) 185
Non-stoichiometric dissolution
Non-stoichiometric dissolution of lanthanum fluoride (LaF_3) and its relevance to a process of ion-selective charge separation at the solid|solution interface (Tani et al.) 205
Numerical model
A numerical ac-impedance model used for the analysis of a polyvinylferrocene coated electrode (Deiss et al.) 93

On-wafer fabrication
Organic membranes for miniaturized electrochemical sensors: fabrication of a combined pO_2, pCO_2 and pH sensor (Arquint et al.) 177

Palladium oxide thin films
Impedance characterization of thin electrochemically formed palladium oxide films (Zhang et al.) 63
Polarizable liquid|liquid interface
Theory of transient potential response of ion-selective electrodes based on polarizable liquid|liquid Interface (Senda) 215
Polymer modified electrodes
Model dependence and reliability of the electrochemical quantities derived from the measured impedance spectra of polymer modified electrodes (Inzelt, Láng) 39
Polypyrrole
Electroreflectance study of redox reactions of methylene blue incorporated into polypyrrole coated on a pyrolytic graphite electrode (Imabayashi et al.) 103
Polysiloxane
The design of durable Na^+-selective CHEMFETs based on polysiloxane membranes (Brunink et al.) 185
Polyvinylferrocene
A numerical ac-impedance model used for the analysis of a polyvinylferrocene coated electrode (Deiss et al.) 93
Power-law exponents
Power-law exponents and hidden bulk relation in the impedance spectroscopy of solids (Macdonald) 17

Radiochemical method
Adsorption characteristics by a radiochemical method on smooth electrode surfaces (Sung et al.) 131
Radiotracer technique
Adsorption characteristics by a radiochemical method on smooth electrode surfaces (Sung et al.) 131
Rhenium
Investigation of the electrodeposition and behaviour of Re layers by coupled radiochemical and electrochemical methods (Horányi, Bakos) 143
Richtmyer modification
The Richtmyer modification of the fully implicit finite difference algorithm for simulations of electrochemical problems (Mocak, Feldberg) 31

Self-assembled monolayer
Discreteness-of-charge effects at an electrode covered with a self-assembled monolayer containing a simple redox couple (Fawcett) 117
Smooth electrode surfaces
Adsorption characteristics by a radiochemical method on smooth electrode surfaces (Sung et al.) 131
Statistics Models
Critical issues associated with interpretation of impedance spectra (Orazem et al.) 51
Supported liquid membrane
A hollow fibre supported liquid membrane system for metal speciation and preconcentration: calculation of the response time (Keller et al.) 165
Surface chemistry
Non-stoichiometric dissolution of lanthanum fluoride (LaF_3) and its relevance to a process of ion-selective charge separation at the solid|solution interface (Tani et al.) 205
Surface-enhanced Raman scattering
Water and electrolyte structure at Ag electrodes in nonaqueous butanol solutions using surface-enhanced Raman scattering (Pemberton, Joa) 149

Temperature
The role of water and temperature in the electrochemical behavior of solid iron(III) hexacyanoferrate(II/III) (Piela et al.) 159
Ternary oxides
Impedance measurements on single crystals of the oxygen ion conductor BICUVOX (Kurek et al.) 77
Transfer functions
Lithium insertion in WO_3 studied by simultaneous measurements of impedance, electrogravimetric and electro-optical transfer functions (Gabrielli et al.) 85
Transient potential response
Theory of transient potential response of ion-selective electrodes based on polarizable liquid|liquid Interface (Senda) 215

Transport numbers
A new method for determining transport numbers of charged membranes from convective diffusion experiments (Kontturi et al.) 111
Tungsten (VI) oxide
Lithium insertion in WO_3 studied by simultaneous measurements of impedance, electrogravimetric and electro-optical transfer functions (Gabrielli et al.) 85
Water
Water and electrolyte structure at Ag electrodes in nonaqueous butanol solutions using surface-enhanced Raman scattering (Pemberton, Joa) 149
The role of water and temperature in the electrochemical behavior of solid iron(III) hexacyanoferrate(II/III) (Piela et al.) 159
